Term 4, Week 3- 2019

Exploring our environment

This term has begun with a strong interest in exploring our environment such as playing in our new garden area and finding bugs and snails. The children are engaged and making predictions about what they find in their environment to then discuss with peers and educators and research to learn more.

They are also making them a home with food, caring for what they find and proudly showing their family and friends what they have found. Thank you for sharing stories and photos about how your child's interest has continued at home. We look forward to continuing to make improvements to our new outdoor environment this term.

Kindergarten Orientation

This term, our friends starting school in 2020 will be going to orientation. Thank you for communicating when your child will be at orientation at the school they will be attending for Kindergarten. Children in Session Two going to orientation at our school will be taken up to orientation by Miss Pilkington and families and collected from the Kindergarten classroom. Please ensure you sign out at Kindergarten on our sign out sheet. Children in Session Two not going to Central or Kindergarten in 2020 will continue their program in Preschool as normal with some slight staffing changes.

Treasure Every Moment with your Child!

(What special moment are you going to treasure with your child today?)

- Have a cuddle with your child and read a book together.
- Go to the park for a play with your child.
- Take the time to do your child's favourite activity with them.

We would love to hear about special moments you have with your child each day. Your children love you so much!

Children's Day in the Park!

Thank you to all families for your support and understanding with the changes with Preschool for Children's Day in the park.

The day in the park was a huge success with many families joining in some engaging activities with some early childhood, family and health services in our community.

We hope you have a great day and connected with your friends and other services in our community who can support your child and your family.

This week's theme of children's week for us to all reflect on:

"Children have the right to good quality health care, clean water, nutritious food and a clean environment so that they will stay healthy".

We all support one another to give our children the best possible opportunities.

Friendly Reminder!

As the days get hotter and the play gets messier and the days are filled with learning, growing and learning- please remember to pack spare clothes, a hat and water bottle each day in your child's bag. Thank you for your support!
