

Dear Families,

It has been wonderful to see you all returning to school this week. We have all had lots of fun and are excited to see all our friends again. With the colder weather upon us it is important that we have our warm clothes on as we are still playing outside. Big jackets are fantastic, but we can get a little warm after running around. If you could please dress your child in a jumper underneath any big jackets so they are able to take off layers. Thanks!

Gardening

We have been working hard in our vegetable garden removing any grass that is growing amongst our vegetables. In group time we looked at how our vegetables grow. We discovered that soil, sun and water are all needed requirements to help all plants grow.

Vegetable scraps

In the coming weeks we are going to be looking at insects. One of our favourite creepy crawlies to watch are our worms in our worm farm. If you have any vegetable scraps such as pumpkin, broccoli and spinach, our worms would love to eat them. Please send them into school in a separate bag with your child.

Immunisations and Health Care cards

As there has been a large break in face to face school, several children have been due for their immunisations in this time. Our records also show that some health care cards have expired. If you would be able to pass this information on to the front office as soon as possible it would be greatly appreciated. Thank you.

Please forward all financial enquiries to the main school office or call Ph: 8087-3522
